

## Poser une division euclidienne

Pose ces divisions euclidiennes et donne le résultat

$$\begin{array}{r} 78 \overline{) 4} \\ - \phantom{00} \\ \hline - \phantom{00} \\ \hline - \phantom{00} \\ \hline \end{array}$$

$$\begin{array}{r} 67 \overline{) 5} \\ - \phantom{00} \\ \hline - \phantom{00} \\ \hline - \phantom{00} \\ \hline \end{array}$$

$$\begin{array}{r} 42 \overline{) 4} \\ - \phantom{00} \\ \hline - \phantom{00} \\ \hline - \phantom{00} \\ \hline \end{array}$$

$$\begin{array}{r} 63 \overline{) 5} \\ - \phantom{00} \\ \hline - \phantom{00} \\ \hline - \phantom{00} \\ \hline \end{array}$$

$$\begin{array}{r} 54 \overline{) 4} \\ - \phantom{00} \\ \hline - \phantom{00} \\ \hline - \phantom{00} \\ \hline \end{array}$$

$$\begin{array}{r} 86 \overline{) 4} \\ - \phantom{00} \\ \hline - \phantom{00} \\ \hline - \phantom{00} \\ \hline \end{array}$$
